

## MAGNETIC LATCHES

Tecnica Design magnetic latches provide the perfect solution for ultra-quiet residential applications. With no protruding bolt or strike lip, these latches offer a clean, minimalist look to homeowners looking to create unique flush-to-wall installations free of unsightly strikes or bolts.

## Magnetic Latches

All TECNICA DESIGN levers are available with magnetic latches and strikes providing the perfect solution for ultra-quiet applications. With no protruding bolt or strike lip, these latches offer a clean, minimalist look for those looking to create unique, flush-to-wall, and snag-free installations free of unsightly latch bolts or strike lips.

- Strike and latch use strong neodymium (rare earth) magnets.
- Ergonomic 30-degree activation.
- Requires the same tools and door preparation as classic tubular latches.
- Pair with invisible hinges for unique flush-to-wall door installations.
- Not for use in fire-rated applications. Cannot be used with a DOREX firecan kit.
- Only available for Passage or Privacy (with auto-release) functions.

### HOW DOREX MAGNETIC LATCHES WORK

**WHEN OPEN**, the latch is held retracted while the door is open for a clean, minimalist look. Since the strike has no lip, it is not visible.

**WHEN CLOSING**, a rare-earth magnet will instantly and quietly pull the latch into the strike to latch the door securely.

**WHEN USING** the lever, the latch will quietly retract and be held magnetically. Even when the lever is released, the latch will remain retracted in its housing.
